

# Nature

## PRIVATE VILLA

In naming Villa Nature, its owner proudly paid homage to its setting. Ensnconced in an expansive parcel of land, this bi-level villa is built into the natural rock and surrounded by lush tropical gardens. And the views are spectacular! Villa Nature is all about privacy and tranquility, yet it has all of the latest 21st-century mod-cons, like lots of USB ports to keep guests devices charged, iPads that control retractable movies screen in a couple of the bedrooms, and a Bose sound system throughout. The décor is chicly contemporary with a rustic touch and is comprised of four pavilions. One encompasses a well-equipped kitchen, a high-top dining area, a piano, and a comfortable living room ideal for conversation or TV viewing. An extra-long infinity pool is heated and the focal point of a deck that includes a dining gazebo. A guest bath is conveniently located just off the main deck.

Three of the bedrooms have en suite baths (with double vanities and private WCs) and his-and-hers closets. Two are on the main level; one, with a queen bed, has a 4th bedroom twin-bedded loft accessible via a ladder—ideal for parents with younger children. The third bedroom is on the upper level, where there’s a Jacuzzi and a path to the upper gardens. Guests can keep their devices charged by using the USB ports found in each bedroom. Bedrooms two and three feature surround sound, SMART TVs with movie screens that come down from the ceiling remotely by using the iPads provided. ...more at [stbarth.com/villas/detail/NAURE](http://stbarth.com/villas/detail/NAURE)
